

Honeywell Genetron® Performax™ LT (R-407F) Refrigerant

**Best Capacity, Most Efficient,
Lowest GWP Alternative to R-22**

Honeywell

Outperforms Alternatives for New Supermarket Installations and Retrofits

The accelerated phase-out of R-22 means many supermarket refrigeration engineers will be looking for alternatives to R-22 to retrofit their systems. For retrofits or new supermarket installations, choose the refrigerant with the best combination of:

- Capacity
- Efficiency
- GWP
- Mass flow

Outperforms Popular R-22 Retrofit Alternatives

- Best capacity match to R-22 in medium- and low-temperature applications
- The most efficient R-22 retrofit option in the marketplace
- Lowest GWP (1824) among R-22 replacements for commercial refrigeration
- Requires POE
- No TXV change or adjustments

- Compressor manufacturer approvals
- Lower discharge temperature than R-22

Product Availability

- Genetron Performax LT is sold through all Honeywell Genetron refrigerant wholesalers
- Product is available in 25# JUG™, 115# Cylinder, and Bulk

Approved by Major Compressor Manufacturers

In 2011, Emerson Climate Technologies approved Performax LT as a retrofit solution for supermarkets and single/multi-compressor refrigeration applications using its Copeland® Discus® compressors with R-22. Liquid injection is required to keep the compressor running cool in low temperature systems.

Bitzer compressors also approved the use of Performax LT in North America as an R-22 retrofit solution for medium-temperature systems.

Genetron Performax LT is UL Classified.
